p. 96; Managing better with job descriptions, June, p. 72; Printers and plotters: More versatile than ever, July, p. 66; The newest crts; graphics and more, Aug. p. 90; Computers lift your company's prospects, Oct. p. 74; Organizing MIS/dp to meet the new challenges, Oct. p. 156; Should you switch to in-house timesharing?, Nov. p. 128; Storing more and more, Dec. p. 88

Yeager, Joseph C., Know your own power!, Feb. p. 128

Subject

Benchmarking

Smart benchmarking—the key to successful procurement? John Seaman, Mar. p. 74

Carriers

Picking an uncommon common carrier, John Seaman, Jan. p. 42

Communication

Are you getting through to your staff? Eugene Raudsepp, May, p. 146

Compensation

Compensation package up to par? John Seaman, May, p. 78

Consultants

Taking the risk out of choosing and using consultants, Josh Martin, Apr. p. 58

Contract professional

Contract pros can get you out of a bind, J. Snyders and S. Ketchum, Aug. p. 56

Crime

Computer crime, Martin Lasden, June, p. 104

Data communications

Picking an uncommon common carrier, John Seaman, Jan. p. 42

Picking the right data-comm pieces, John Seaman, Nov. p. 92

What Reagan's tax cuts mean to dp, Mark E. Battersby, Oct., p. 70

What you should expect from user groups, David Whieldon, May, p. 96

What's coming down the pike in software, Jan Snyders, Dec., p. 122

What's new in portable terminals, Martin Lasden, May, p. 112

When you have to move your dp center, Josh Martin, Oct., p. 124

Will you really benefit from Reagan's tax proposals? Mark E. Battersby, Apr., p. 157

Word-processing packages for mainframes, minis, and micros, Mel Mandell, Jan., p. 76

You can negotiate anything, Herb Cohen, May, p. 70

UNEXPLAINED MEMORY LOSS?

LINE TAMER™ FERRORESONANT TRANSFORMERS MAY BE THE ANSWER!

Power line spikes, brownouts and in-audible noise can wipe out all or part of computer memory, leaving you the arduous task of reconstructing your data. Line Tamer™ ferroresonant transformers protect sensitive computer equipment from such power pollution by isolating the noise and stabilizing the voltage.

Line Tamer™ ferroresonant transformers need little space and require no step up/step down transformers or complicated wiring. They are available in sizes up to 250 KVA in both single- and three-phase to satisfy the requirements of virtually any system. Most sizes are U.L. listed.

Call us for complete specifications and the name of your local distributor.
